-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1648.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to method of analyzing a biological sample to detect cells infected by human papillomavirus, classified in class 514, subclass 44.
- II. Claims 4-8, drawn to method of separating cells from extracellular human papillomavirus, classified in class 435, subclass 5.
- III. Claims 9-13, drawn to method of separating cells from extracellular HPV wherein medium comprises extracellular HPV to cell ratio, classified in class 436, subclass 535.
- IV. Claims 14-18, drawn to method of analyzing a biological sample to detect cells infected by a virus, classified in class 536, subclass 23.76.
- V. Claims 19-25, drawn to method of separating cells from extracellular viral particles, classified in class 435, subclass 239.
- VI. Claims 26-32, drawn to method of separating viral particles wherein the medium having a first extracellular viral particle to cell ratio, classified in class 435, subclass 325.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I-VI are mutually exclusive and patentably distinct methods which are substantially different. The multiple methods have different uses. The examination of all

Art Unit: 1648

groups would require different searches in the U.S. Patent Shoes, in house and commercial databases, and scientific literature and would require the consideration of different patentability issues. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Presently, the methods differ since for example the method of Group I is directed to detection and method of Group II is directed to separation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
